PERSONAL

Informatics student specializing in Artificial Intelligence with experience in software development, web application development, and AI-powered systems. Skilled in Python, TypeScript, Next.js, FastAPI, and LangChain, with hands on experience building full stack applications and integrating Retrieval Augmented Generation and Computer Vision models into practical, real world software solutions. Passionate about developing scalable, intelligent, and user centered software while continuously exploring emerging AI technologies.

EDUCATION

PRESIDENT UNIVERSITY, *Concentration in Artificial Intelligence* 09/2024 – Present | Cikarang
GPA 3.64 / 4.00
- Coursework: Artificial Intelligence, Deep Learning, Machine Learning, Natural Language Processing, Computer Vision, Software Engineering, Web Programming, Mobile Programming, Database Systems.

PROJECTS

- PT. Mattel Indonesia ToolCrib: Inventory System with AI**, *AI Engineer* 06/2026 – Present
- Tech Stack: Python, LangChain, Ollama (Llama 3), ChromaDB, Sentence Transformers, FastAPI, Pydantic, pdfplumber, RESTful API
 - Developed an intelligent RAG chatbot assistant to automate tool inventory lookups and warehouse queries for factory operations, integrating LangChain, ChromaDB, and Llama 3 for context-aware retrieval and Indonesian-language response generation.
 - Engineered a hybrid retrieval engine combining exact SKU keyword lookup, vector similarity search, and intent-based score boosting, with a multi-tier confidence threshold system to filter irrelevant context and prevent hallucinations.
 - Designed an automated PDF parsing pipeline using Llama 3 and 3-tier fuzzy string matching (Code → Substring → Levenshtein) to extract restock items from Delivery Orders, and built scalable FastAPI endpoints for real-time query processing and session memory.
- Keshir POS (Smart Cafe Management System)**, *AI Engineer* 03/2026 – 05/2026
- Tech Stack: Python, Ollama (Local LLM), scikit-learn, NumPy, Pandas, TensorFlow, Prompt Engineering, RESTful API
 - Developed and integrated a context-aware AI chatbot leveraging local LLMs (Ollama) to provide real-time assistance for both customers and cashiers.
 - Engineered dynamic prompt templates and context-injection mechanisms to ensure accurate, role-specific responses within a cafe operational environment.
 - Designed and implemented API endpoints connecting the local AI inference engine with the core Laravel backend, optimizing response latency and system reliability.
- Scio: AI Powered IT Helpdesk RAG Chatbot**, *AI Engineer, Frontend* 01/2026 – 02/2026
- Tech Stack: Ollama, LangChain, RAG, ChromaDB, Sentence Transformers, React, Next.js, TypeScript, Tailwind CSS
 - Developed an AI-powered IT Helpdesk chatbot using RAG, integrating LangChain, ChromaDB, and Llama 3 for semantic document retrieval and response generation.
 - Built RESTful APIs with FastAPI and persistent conversation storage via SQLite, improving answer reliability by retrieving from over 10,000 IT documentation articles before generating responses.
 - Designed a responsive Next.js frontend with real-time chat, source citations, and feedback functionality.
- GlowingKeun AI (Skin Analysis & Recommendation Platform)**, *AI Engineer, Web Developer* 10/2025 – 11/2025
- Tech Stack: Python, Flask, YOLOv8, ResNet18 (CNN), DeepFace (Facenet512), SQLite, Vanilla JavaScript, RESTful API
 - Engineered a multi-model Computer Vision pipeline using YOLOv8 for real-time acne detection and a ResNet18 CNN for skin type classification.
 - Designed a Forward-Chaining Rule-Based Decision Support System translating skin analysis results into personalized skincare regimens, with Facenet512 biometric facial recognition for secure user authentication.
 - Developed a decoupled Flask + Vanilla JS architecture, optimizing asynchronous API calls to offload heavy neural network computations and achieve near real-time inference under 2 seconds.

EXPERIENCE AND ORGANIZATION

- President University Robotics and Technology Club**, *Research and Technology* 10/2024 – 08/2025 | Cikarang
- Conducted research on robotics, automation, and emerging technologies to expand technical knowledge.
 - Participated in technical discussions and knowledge-sharing sessions with division members.
 - Analyzed technology trends and engineering concepts to support research and innovation initiatives.
 - Collaborated with team members to share research findings and contribute ideas for the club's technical activities.

- PT. Solusindo Bintang Pratama**, *Internship, IT Support* 01/2023 – 06/2023 | Jakarta
- Performed fiber optic splicing for new and existing clients to ensure stable and reliable internet connectivity.
 - Installed and connected customer routers to the company's fiber optic network through fiber splicing.
 - Monitored and maintained Bandwidth on Demand (BoD) services to optimize bandwidth allocation and improve network performance.
 - Assisted in network troubleshooting by identifying and resolving internet connectivity issues efficiently.
 - Managed warehouse inventory by inspecting, recording, and tracking incoming and outgoing network equipment.
 - Consistently complied with company policies, safety procedures, and professional work standards throughout the six-month internship.

SKILLS & CERTIFICATES

Technical Skills

- Programming Languages: Python, JavaScript, TypeScript, C++, PHP, Dart.
- Web & Software Development: React, Next.js, Node.js, Tailwind CSS, Laravel, Fultter, Flask, FastAPI, Rest API design.
- AI & Machine Learning: RAG, Computer Vision, Image Processing, LLMs, TensorFlow, LangChain, NLP, OpenCV, HuggingFace.
- Data Science & Analytics: Pandas, NumPy, Matplotib, Data Preprocessing.
- Database: MySQL, PostgreSQL, SQL Server, ChromaDB.
- Tools & Platforms: Git, GitHub, VS Code, Figma, Jupyter Notebook, Google Collab, Arduino IDE, Blender 3D, Android Studio.

Interpersonal Skills

- Team Collaboration & Leadership
- Adaptability to New Tech
- Analytical Thinking & Problem Solving
- Effective Communication

Certificates

- Bootcamp Become MikroTik Engineering (ID-Networkers)
- Competency Installation and Configuration of Routing on Networks Devices (ID-Networks)
- AWS Academy Cloud Fondation Course (AWS Academy)
- Certificate Internship (SBP Net)
- Fundamental Course Software Engineering (RevoU ID)
